

## SL-908 Gas pipeline detector

### 1、Main technical index

contour: Hand push

detected gas: Natural gas, liquefied petroleum gas, artificial coal gas

sensitivity: 0~1000ppm, better than 50ppm

1~100%LEL better than 1%LEL

Detect density: 0~1000ppm, 1~100%LEL (automatic regulation)

warm-up time: 10s

response time: <10s

battery: 9.6V Rechargeable lithium ion battery

charging time: >4H

standby time: >8H

working temperature: -10°~60°

relative humidity: <95% (free from condensation.)

Wind speed: <2m/s

gas flow rate: 1L/min

display: lcd backlight

size: 1100 mm×230 mm×280mm

weight: 6.7kg

sensor : imported gas sensitive sensor

### 【Accessories】

charger、filter paper、product manual
